

# The adeahub Platform

adeahub, part of the entomo Group, is an enterprise healthcare technology platform designed to support large healthcare networks and public health agencies.

We enable connected, data-driven healthcare systems by integrating clinical workflows, patient engagement, and real-time insights into one unified ecosystem.

Building the foundation for more connected, efficient, and future-ready healthcare systems.

ADEAHUB SITE

 adeahub

A unified platform built for healthcare that **never stops**

Enabling care journeys, hospital operations, system-wide intelligence, and seamless data exchange across public and private healthcare, powered by open standards.

# The adeahub Ecosystem

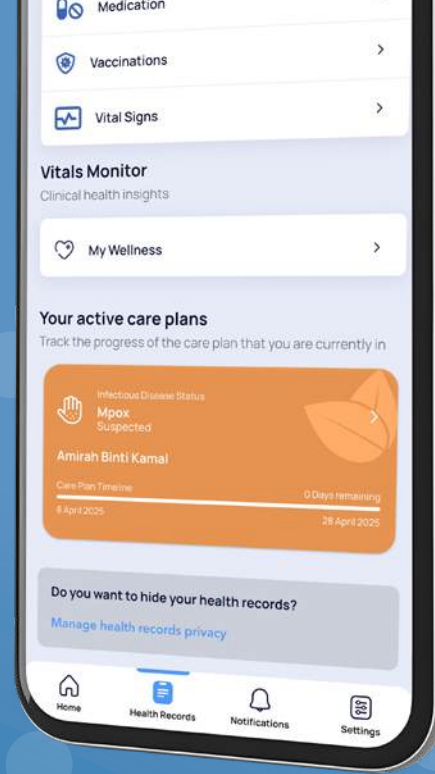

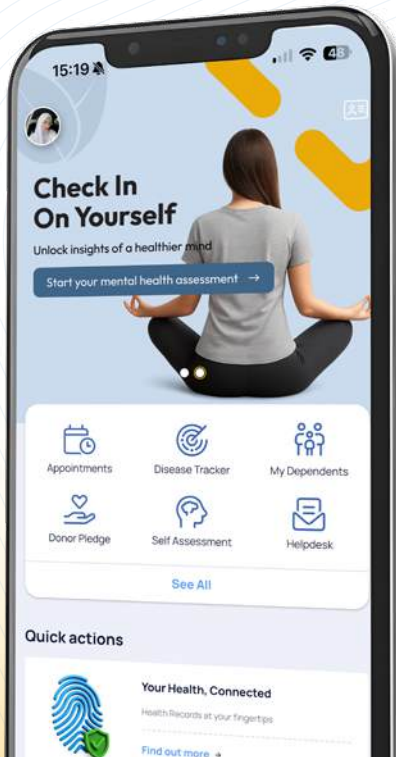

One platform.  
Multiple capabilities.

## AH Engage

a customer-branded patient engagement product connecting patients to their care teams before, during, and after every visit.

## AH Care

a comprehensive Single Instance, Multi-Site Health Information System - from patient registration through to discharge.

## AH Connect

a FHIR-native health data ingestion, indexing, and integration platform - connecting hospitals, clinics, devices, and government systems into a single, unified patient record.

## AH Insights

a healthcare prescriptive, predictive analytics platform that consolidates clinical, operational, and financial data into real-time dashboards - giving leaders the intelligence to act before problems escalate.
